### THE PROPERTY

Chain Cottage is a very pretty newly built house with a private rear garden. It has been finished to a high standard with contemporary kitchen and bathrooms. There is flooring throughout with a mix of carpets and laminate wood. The property also comes with a positive input ventilation system and benefits from air source central heating with radiators on the first floor and underfloor to the ground floor.

### OUTSIDE

There is a generous block paved driveway with parking space for several cars, side access leads to the private rear garden which has a patio area, newly turfed lawn enclosed with close board fencing.

### LOCATION

Headley/Ashford Hill is a thriving village community conveniently located for Newbury, Basingstoke and Kingsclere, giving access to the M3 and M4. The village offers a good range of facilities including a community shop and local infant/junior school.

### DIRECTIONS

Leave Newbury on the A339 Basingstoke Road, pass New Greenham Park and head towards Basingstoke. Climb the hill and the site will be seen on the left hand side before Headley tyres.

This is a Predicted Energy Assessment for a property which is not yet complete. It includes a predicted energy rating which might not represent the final energy rating of the property on completion. Once the property is completed, an Energy Performance Certificate is required providing information about the energy performance of the completed property.

Energy performance has been assessed using the SAP 2012 methodology and is rated in terms of the energy use per square metre of floor area, energy efficiency based on fuel costs and environmental impact based on carbon dioxide (CO<sub>2</sub>) emissions.

### Energy Efficiency Rating

### Environmental Impact (CO<sub>2</sub>) Rating

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be.

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO<sub>2</sub>) emissions. The higher the rating the less impact it has on the environment.
